

ASSIGNMENT- 3

PROJECT DOMAIN	INTERNET OF THINGS
PROJECT TITLE	IoT BASED SMART CROP PROTECTION SYSTEM FOR AGRICULTURE
TEAM ID	PNT2022TMID44357
NAME	SAKTHI S
ROLL NO	731119106027
DATE	06 OCTOBER 2022
MAXIMUM MARKS	2 MARKS

QUESTION:

WRITE PYTHON CODE FOR BLINKING LED AND TRAFFIC LIGHTS USING RASPBERRY PI.

1.PYTHON CODE FOR BLINKING LED USING RASPBERRY PI

CODE:

```
from gpiozero import LED          # importing GPIO pins as LED
from time import sleep            # importing time function as sleep

red = LED(18)                     # red LED is connected to GPIO 18

while True:                       # infinite loop

    red.on()                       # red LED is on for 1 second

    sleep(1)

    red.off()                      # red led is off for 1 second

    sleep(1)
```

1.PYTHON CODE FOR TRAFFIC LIGHTS USING RASPBERRY PI

CODE:

```
from gpiozero import LED          # importing GPIO pins as LED
from time import sleep           # importing time function as sleep

red = LED(23)                    # red LED connected to GPIO 23
yellow = LED(07)                 # yellow LED connected to GPIO 07
green = LED(19)                  # green LED connected to GPIO 19

while True:                      # infine loop

    red.on()                     # red LED is on for 5 seconds to make stop
    sleep(5)

    red.off()

    yellow.on()                  # yellow LED is on for 2 seconds to make ready
    sleep(2)

    yellow .off

    green.on()                   #green LED is on for 5 seconds to make go
    sleep(5)

    green.off()
```
